"The teenager's different stages and the sexual behaviours attached to it"

The participants were divided as follows:

Categories	%	%	%
Age	(20-30 yrs old) 60%	(31-40 yrs old) 30 %	(41 +) yrs old 10 %
Specialization	Psychologist : 10 %	Health specialist & project coordinators: 30 %	Social Workers: 50 %
Institution affiliated with	Banaty: 40 % Basmat Amal: 30 %	Al Shehab : 20 % Women's institution: 10 %	CEWLA: 10 %
Type of activities they cover:	Women Empowerment: 30 %	Child psychiatry: 65 %	Others: 0 %

- The majority of the participants were of the younger age which is a good sign, for the relevance of the topics that the training covered. As well, based on the topics were raised at the training in regards to the sexual behaviours of the female teenagers, good percentage of the Banaty NGO were attending, hopefully that this helped in achieving the target of the training and what they were looking for.

Pre-Training Evaluation sheet:

1. What are your expectations/ do you think the training is suitable for the NGO needs?	**%**
It fits our needs in general	75 %
We need to know more about how to handle the female teenagers	15 %
We need to know how to help the parents over the teenagers' needs	10 %

- The preferences here are based on our announcements about the training; as it seems we shortly mentioned something about the sexual behaviours of the teenagers. In other words, we need to clarify to all the NGOs participants before the training about the content of the training in-details, so they get to prepare themselves better if they have anything that they needs to be illustrated. And I can do that, I as I suggest if I contact them asking in details about their preferences.

2 .What kind of skills you need to learn from this workshop?	**%**
We need to know how to contain the different stages of the teenagers professionally & with their parents	65 %
We need to learn how to handle the	15 %

sexual behaviours of the teenagers	
We need to learn how to prepare the kids for the teenagers different temporal behaviours	15 %
We need to know how to handle the handicapped teenagers	5 %

- As you can see here, based on these preferences you can define where the flow of the session were going, and based on the NGOs needs you can understand how many of them really wanted to discuss some main issues. The majority wanted something in general, and very few wanted something more specific.

3. What do you certainly know about the topic of the workshop?	**%**
I already know how to handle teenagers' behaviours	30 %
I already know about the different changes that come across the different stages of the teenagers	50 %
I still need to know about how to handle the sexual behaviours of the teenagers	15 %
I know nothing	5 %

- Here also, you can find how many of them already know about the topic, a total of 80 % know more than others. However, very few mentioned they need to know about the sexual behaviours of the teenagers and based on the main objective of the training, we can say if we ever managed to achieve our target from this training. Whether it was something in general or more in specific, as some of them already know about it generally.

4. Do you have any argumentative issue about the topic of the workshop?	**%**
I know about the teenagers behaviour but I don' know from where to start	15 %
I have no arguments about the topic	70 %
I still need to know about how to communicate with the parents of the teenagers	15 %

- I always prefer if the trainees illustrate any argumentative issue about the topic of the workshop, which means they’re looking for a better understanding of the topic and a better containment of the content of the training. However, the majority has nothing argumentative about it, which indicates how far they claim they know about it. My suggestion, if by the beginning of the session we test their knowledge by asking few questions about it, as a mean of breaking the ice about it or try to make it in a funny way to illustrate who knows better.

5. What do you think about the (instructors, the location, the	**%**

timing, the program of the workshop) ?	
The instructors are good	10 %
The timing is not good	15 %
The location is too far	10 %
The location is good	15 %
Nothing	60 %

- Some of the trainees, mentioned they hate having training on a normal working day, besides some others are still complaining about how to reach the location of the training.

"The teenager's different stages and the sexual behaviours attached to it"

Post-Training Evaluation sheet:

1. Have you found what you were looking for after the workshop?	**%**
Yes	65 %
Yes, it covered the sexual behaviour part	10 %
Yes, it covered more in general the different behaviours of the teenagers and how to handle it	20 %

2. What kind of skills you'd master after the workshop?	**%**
How to handle the different teenagers' stages	75 %
How to prepare the kids for the forthcoming different teenagers' stages	15 %

3. What are the main points you still want to know more about?	**%**
I still need to know more about the different disorders of the teenagers	50 %
I still need to know more about how to intervene more positively with the teenagers	15 %

- Here, I recommend if we conclude with other trainings about the teenagers, but by giving more examples or to investigate more with the NGOs through the follow-up visits. If they're still facing any other difficulties with the teenagers coming by their NGOs, or if they need to discuss something more in specific next time.

4. What do you think about the instructors (communication skills, illustrating main points, handling	**%**

discussions and activities)?	
Excellent (they got experience about the topic)	30 %
Very Good (I liked the activities were given to us)	40 %
Good	25 %

5. What are your plan/ the priorities now after receiving the training?	**%**
I'll prepare different workshops to include the parents of the teenagers while dealing with them	30 %
I'll prepare other workshops to the local community to raise awareness about the needs of the teenagers	20 %
I'll get more involved in workshops to handle the teenagers' needs in a better way	45 %

- I really liked this part of the comments about the future plans of the NGOs staff, when it comes to handling the needs of the teenagers, but

I guess the final judgement is going to be about the level of commitment they have. And also, if they’ll need any help when starting to give these sessions for the public.
